WORK EXPERIENCE

Full Stack Developer | Grow Infinity Realtors   **September, 2024 – October, 2024**

- Developed a real estate property website using the MERN stack, featuring property listings and user interactions.
- Built an attendance portal using the MERN stack with features like employee management, attendance tracking, and report generation.
- Database: Added Firebase as form submission database for higher bandwidth.

Full Stack Developer | Markle Tech And Media   **August, 2023 – September, 2024**

- Back-end Development: Contributed to the development of dynamic web applications using PHP, Laravel.
- Database Integration: Implemented data storage and retrieval solutions using MySQL.
- Front-End Development: Created interactive user interfaces using HTML, CSS, and JavaScript, leveraging Bootstrap and Tailwind CSS for efficient development.

Web Developer | Pranjali GrowCap   **April, 2023 – July, 2023**

- Utilized HTML, CSS, JavaScript to create interactive and visually appealing user interfaces.
- Deployed Bootstrap and Tailwind CSS frameworks to streamline the front-end development process.

PROJECTS

Movie Flix | link
The Dynamic React App, crafted by React JS and Tailwind CSS, seamlessly integrates the TMDB
API to offer users an immersive exploration of movies and TV shows. Featuring a sleek and
responsive interfaces, the app leverages React's component-based structure for efficient
UI management and Tailwind CSS's utility-first approach for rapid customization.

Youtube Clone | link
The YouTube clone, built using React.js and the YouTube API, replicates YouTube's functionality.
Users can search, watch, and interact with videos, including liking and commenting. It offers a
responsive design and recommendations based on the current video. This project is an
exercise in React.js and API integration for practical learning.

CERTIFICATIONS

The Complete Web Development Bootcamp | link

- Learned professional developer best practices. Grasped core concepts like data types,
- control flow, functions, and OOP.
- Wrote clean, maintainable code using best practices for efficiency and reusability.
- Build fully-fledged websites and web apps.
